Outstanding Games

-Cube AR

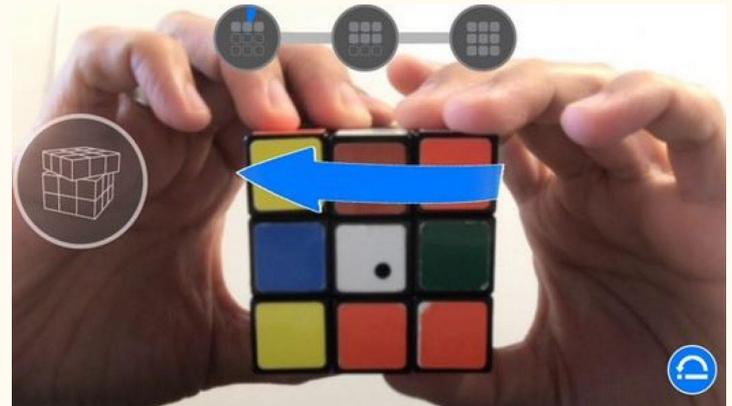

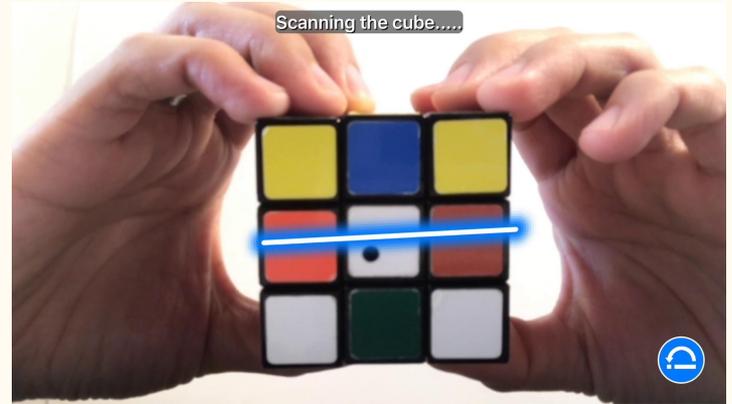

-Minecraft Earth

-Ink Hunter

Cube AR

- Free (for the first 2 layers)
- Comprehensive
- Easy to scan/ get started
- Greatly increases solving time
- Surprisingly accurate

Minecraft Earth

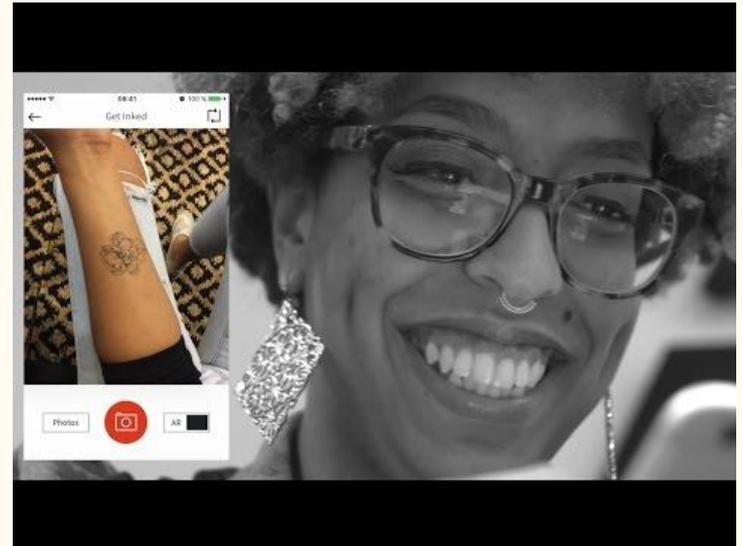

- Free to play game
- Multiplayer
- Playable on any flat surface
- 6 degrees of freedom
- Not the most accurate
- Plenty of varying gameplay

InkHunter

- Free (pay for more designs)
- Easy to understand
- Cool planing tool
- Perfect for Tattoo enthusiasts
- Affordable option for those looking for tattoos (test drive)

What Makes InkHunter Special? (affordances)

- Allows a special AR code to be drawn anywhere on the body
- Allows for hundreds of designs to be custom wrapped to the curvature of your body
- Ability to put custom tattoos anywhere on your body at multiple different sizes

InkHunters Limitations

- Some trouble reading the code in certain environments (Lighting)
- Trouble reading the code at certain angles (has to be fully in frame)
- Not as effective with high movement or from a distance
